

# QSFP56 200GBASE-SR4 850nm 100m Transceiver

## General Description

The 200G QSFP56 SR4 Transceiver is designed to transmit and receive serial optical data links up to 50 Gb/s data rate (per channel) by PAM4 modulation format over multi-mode fiber. It is a small-form-factor hot pluggable transceiver module integrated with the high performance VCSEL laser and high sensitivity PIN receiver.

## Features

- Up to 50Gbps data rate per channel by PAM4 modulation
- 4 duplex channels transmitters and receivers
- Integrated 850nm VCSEL array and PD array
- Single MPO-12 connector receptacle optical interface compliant
- Single +3.3V power supply
- DDM function implemented
- Hot-pluggable QSFP56 form factor
- Maximum link length of 100m on 12 core MPO/OM4 (MMF) fiber
- Low power dissipation:<5W
- International class 1 laser safety certified
- Operating temperature range: 0°C ~ +70 °C
- Compliant with ROHS10

## Application

- › 200GBASE-SR4 Ethernet
- › Switch & Router Connections
- › Data Centers
- › Other 200G Interconnect Requirements

## Product Specifications

Not necessarily applied together. Exceeding these values may cause permanent damage. Functional operation under these conditions is not implied.

**Product Specifications**
**I. Optical Characteristics**

| Parameter  | Symbol | Unit | Min          | Typ           | Max  | Notes |
|--|--------|------|--------------|---------------|------|-------|
| Transmitter (per Lane)                                   |        |      |              |               |      |       |
| Signaling Speed per Lane                                 |        | GBd  |              | 26.5625±100pm |      |       |

| 26  |            | GND          | Ground  | 1    |
| 27  | CML-0      | ModPrsL      | Module Present  |      |
| 28  | CML-0      | IntL/RxLOSL  | Interrupt. Optionally configurable as RxLOSL via the management interface (SFF-8636)      |      |
| 29  |            | VccTx        | +3.3 V Power Supply transmitter   | 2    |
| 30  |            | Vcc1         | +3.3 V Power Supply   | 2    |
| 31  | LVTTL-I    | LPMODE/TxDis | Low Power Mode. Optionally configurable as TxDis via the management interface (SFF-8636). |      |
| 32  |            | GND          | Ground  | 1    |
| 33  | CML-I      | Tx3p         | Transmitter Inverted Data Input   |      |

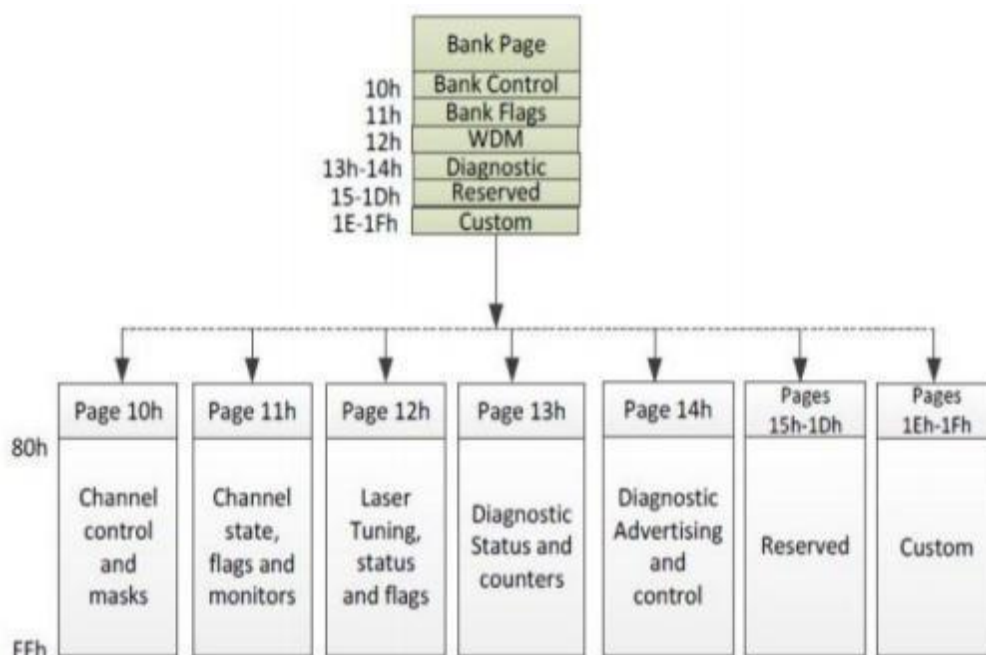

|    |       |      |                                      |   |
|----|-------|------|--------------------------------------|---|
| 34 | CML-I | Tx3n | Transmitter Non-Inverted Data output |   |
| 35 |       | GND  | Ground                               | 1 |
| 36 | CML-I | Tx1p | Transmitter Inverted Data Input      |   |
| 37 | CML-I | Tx1n | Transmitter Non-Inverted Data output |   |
| 38 |       | GND  | Ground                               | 1 |

**Notes:**

1. GND is the symbol for signal and supply (power) common for the QSP28 module. All are common within the module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal common ground plane. 2. VccRx, Vcc1 and VccTx are the receiving and transmission power suppliers and shall be applied concurrently. Recommended host
2. board power supply filtering is shown in Figure 3 below. Vcc Rx, Vcc1 and Vcc Tx may be internally connected within the module in any combination. The connector pins are each rated for a maximum current of 1000mA.

### Figure 3. Electrical Pin-out Details

### IX. Host Board Power Supply Filtering

Any voltage drop across a filter network on the host is counted against the host DC set point accuracy specification. Inductors with DC resistance of less than  $0.1\ \Omega$  should be used in order to maintain the required voltage at the host edge card connector. It is

recommended that the  $22\ \mu\text{F}$  capacitors each have an equivalent series resistance of  $0.22\ \Omega$ . The specification of the host power supply filtering network is beyond the scope of this specification, particularly because of the wide range of QSFP+ module Power Classes. Figure is the suggested transceiver/host interface.
